Subject: Review of CES geology responses
Attachments: Evaluation of CES response to Site char questions.docx

Hi Calvin and Kate,

Attached is our review of CES's responses to the technical questions on the geologic site characterization for which you requested an evaluation.

Our general impression is that they addressed our questions to the extent they could, based on the data they have. We expect that most of the updated information won't be available for review until the pre operational testing is complete. But we do have a few (probably straightforward) clarifying questions.

Note that, as we are reviewing these responses (and the AoR modeling questions), we are keeping CalGEM and the Water Board's questions in mind. (We are generally on the same page, so we had nothing to add to the geologic questions.)

Please let us know if you have any questions.
